

## **Bibliographie**

### **Générale :**

Kabat-Zinn, J. (2005). Où tu vas, tu es. Apprendre à méditer pour se libérer du stress et des tensions profondes (J'ai Lu)

Edel Maex (2007). Mindfulness: apprivoiser le stress par la pleine conscience - Un programme d'entraînement en 8 semaines. (De Boeck-Larcier, collection Comprendre)

Eline Snel (2012) Calme et attentif comme une grenouille. Essai (livre de méditation pour les enfants... et leurs parents)

Shapiro, S. L., Carlson, L. E., Astin, J. A., & Freedman, B. (2006). Mechanisms of mindfulness. *Journal of Clinical Psychology*, 62, 373-386.

### **Cognition :**

Chiesa, A., Calatti, R., & Serretti, A. (2011). Does mindfulness training improve cognitive abilities? A systematic review of neuropsychological findings. *Clinical Psychology Review*, 31, 449-464.

Froelinger, B. E., Garland, E. L., Modlin, L. A., & McClernon F. J. (2012). Neurocognitive correlates of the effects of yoga meditation practice on emotion and cognition: a pilot study. *Frontiers in Integrative Neuroscience*, 6, 1-11.

Holas, P., & Jankowski, T. (2013). A cognitive perspective on mindfulness. *International Journal of Psychology*, 48, 232-243.

Kang, Y., Gruber, J., & Gray, J. R. (2013). Mindfulness and de-automatization. *Emotion Review*, 5, 192-20

Moore, A., & Malinowski, P. (2009). Meditation, mindfulness and cognitive flexibility. *Consciousness and Cognition*, 18, 176-186.1.

Mrazek, M. D., Franklin, M. S., Phillips, D. T., Baird, B., & Schooler J. W. (2013). Mindfulness training improves working memory capacity and GRE performance while reducing mind wandering. *Association for Psychological Science*, 20, 1-6.

Teper, R., & Inzlicht, M. (2013). Meditation, mindfulness and executive control: the importance of emotional acceptance and brain-based performance monitoring. *Social Cognitive and Affective Neuroscience*, 8, 85-92.

### **Attention :**

Lutz, A., Slagter, H. A., Dunne, J. D., & Davidson, R. J. (2008). Attention regulation and monitoring in meditation. *Trends in Cognitive Sciences*, 12, 163-169.

Malinowski, P. (2013). Neural mechanisms of attentional control in mindfulness meditation. *Frontiers in Neuroscience*, 7, 1-11.

Moore, A., Gruber, T., Deroose, J., & Malinowski, P. (2012). Regular, brief mindfulness meditation practice improves electrophysiological markers of attentional control. *Frontiers in Human Neuroscience*, 6, 1-15.

## **Santé :**

Alexander, C. N., Langer, E. J., Newman, R. I., Chandler, H. M., & Davies, J. L. (1989). Transcendental meditation, mindfulness, and longevity: An experimental study with the elderly. *Journal of Personality and Social Psychology*, 57, 950-964.

Berman, M. G., Peltier, S., Nee, D. E., Kross, E., Deldin, P. J. & Jonides, J. (2011). Depression, rumination and the default network. *Social Cognitive and Affective Neuroscience*, 6, 548–555.

Davidson, R. J., Kabat Zinn, J., Schumacher, J. ... & John F. (2003). Alterations in Brain and Immune Function Produced by Mindfulness Meditation. *Psychosomatic Medicine*, 65, 564–570.

Forsyth, J. P., Parker, J. D., & Finlay, C. G. (2003). Anxiety sensitivity, controllability, and experiential avoidance and their relation to drug of choice and addiction severity in a residential sample of substance-abusing veterans. *Addictive Behaviors*, 28, 851-870.

Ostafin, B. D., Kassman, K. T., & Wessel, I. (2013). Breaking the cycle of desire: Mindfulness and executive control weaken the relation between an implicit measure of alcohol valence and preoccupation with alcohol-related thoughts. *Psychology of Addictive Behaviors*, 27, 1153-1158.

Slagter, H. A., Lutz, A., Greischar, L. L., Francis, A. D., Nieuwenhuis, S., Davis, J. M., & Davidson, R. J. (2007). Mental training affects distribution of limited brain resources. *PLoS Biology*, 5, e138.

Teasdale, J. D. (1999). Metacognition, mindfulness and the modification of mood disorders. *Clinical Psychology and Psychotherapy*, 6, 146-155.

## **Douleur :**

Gard, T., Hölzel, B. K., Sack, A. T., Hempel, H., Lazar, S. W., Vaitl, D., & Ott, U. (2012). Pain attenuation through mindfulness is associated with decreased cognitive control and increased sensory processing in the brain. *Cerebral Cortex*, 22, 2692-2702.

Zeidan, F., Martucci, K. T., Kraft, R. A., Gordon, N. S., McHaffie J. G., & Coghill R. C. (2011). Brain Mechanisms Supporting the Modulation of Pain by Mindfulness Meditation. *The Journal of Neuroscience*, 31, 5540-5548.

## **Emotions :**

Brown, K. W., Goodman, R. J., & Inzlicht, M. (2013). Dispositional mindfulness and the attenuation of neural responses to emotional stimuli. *Social Cognitive and Affective Neuroscience*, 8, 93-99.

Goldin, P. R., & Gross, J. J. (2010). Effects of Mindfulness-Based Stress Reduction (MBSR) on Emotion Regulation in Social Anxiety Disorder. *Emotion*, 10, 83–91.

## **Préjugés et stéréotypes :**

Lillis, J. & Hayes, S. C. (2007). Applying acceptance, mindfulness, and values to the reduction of prejudice: A pilot study. *Behavior Modification*, 31, 389-411.

Lueke, A., & Gibson, B. (2014). Mindfulness meditation reduces implicit age and race bias : the role of reduced automaticity of responding. *Social Psychological and Personality Science*, 6, 284-291.

Schimchowitsch, S., & Rohmer, O. (2015). Can we reduce our implicit prejudice? The challenge of meditation. *International Journal of Disability, Development and Education*. In press.

### **Auto-compassion :**

Neff, K. D. (2003). Self-compassion: An alternative conceptualization of a healthy attitude toward oneself. *Self and Identity*, 2, 85-102.

### **Contexte interculturel :**

Mindfulness for the next generation: Helping emerging adults manage stress and lead healthier lives by H. Rogers and M. Maytan.

The Mindful teen: Powerful skills to help you handle stress one moment at a time. Dzong X. Vo. M.D. FAAP published in April 2015.
